Copy No. 3

GEOGRAPHIC MEMORANDUM

COMPENDIUM OF AREA AND POPULATION FIGURES
FOR WESTERN HEMISPHERE COUNTRIES

CIA/RR-G/I-252
20 March 1958

CENTRAL INTELLIGENCE AGENCY
Office of Research and Reports

~~FOR OFFICIAL USE ONLY~~

27 MAR 1958

This informal survey was prepared to help clarify the situation regarding area and population figures for the countries of the Western Hemisphere (excluding the United States and Alaska). Frequently-consulted reference works have been utilized, plus one official source for each country if available. Figures from the 1950 Census have been quoted whenever possible, plus any more recent estimates. Area figures are given in square miles and/or square kilometers according to the sources used. The following sources are quoted if they contain data for the country in question:

British Colonial Office List, 1953.

Foreign Operations Administration, (now ICA). Regional Data Book for Latin America, various dates.

James, Preston. Latin America, 1950.

New World Guides to the Latin American Republics, 1950.

Pan American Union Pamphlets on countries published.

Pan American Yearbook, 1945

South American Handbook, 1956

Webster's Geographical Dictionary, 1949

World Almanac, 1957.

The many variations in the figures for the same item are indicative of the confusion often encountered in dealing with statistics on the countries of the Western Hemisphere. In many instances, an erroneous figure has been picked up by a widely used reference work, and thereby perpetuated even though more reliable data were available from a better source. It is hoped that this compendium will aid the user who has found conflicting data for the countries included. The countries are arranged in alphabetical order with no regional break-down.
